

PROJECT BLUEPRINT: THE SPRAWL

REVISION: 1.0.0 | STATUS: PROTOTYPE PHASE 1 | ENCRYPTION: ACTIVE

01. EXECUTIVE SUMMARY

A tactical, purely turn-based roguelike inspired by the foundations of cyberpunk literature. The core experience centers on the precarious balance between high-tech survival and community-driven ethics.

02. GAMEPLAY PILLARS

- The Matrix Duality:** Maps-within-maps mechanics where digital progress leaves the physical body vulnerable.
- Pure Turn-Based Tactics:** Strategic depth over twitch reflexes; time only moves when the player acts.
- Social Vouching:** A progression system where reputation in "Safe Spaces" provides tangible tactical advantages.
- Persistent Entropy:** Environment destruction is rare but permanent within a run, forcing tactical backtracking.

03. PLAYER CLASSES

Class	Spec	Primary Gear	Phase 1 Utility
The Merc	Ranged	Kinetic Carbine	Vaulting and suppression.
The Razor	Melee	Monofilament Blade	Silent takedowns and sliding.

04. TACTICAL SYSTEMS

A* Pathfinding

Hostile drones utilize dynamic A* algorithms to navigate the grid. They respond to noise alerts and line-of-sight triggers. If the player is jacked-in, AI pathing targets the physical body coordinates.

The Vouch System

Social capital earned through ethical gameplay. High Vouch levels change neutral NPC behavior, providing "social camouflage" and unlocking rare hardware like Thermal Breaching Paste.

05. UI DESIGN (TERMINAL AESTHETIC)

```
SYSTEM_LOG // REV: 1.0.1
-----
MAP_LAYER_0: THE_SLUMS
[ @ ] USER_POSITION
[ d ] DRONE_SENTRY
[ & ] VOUCHED_CITIZEN
-----
BIO_INT: [|||||....] 60%
SYS_RAM: 0x4F / 0xFF
VOUCH:   AMBER_LEVEL
```

06. DEVELOPMENT ROADMAP

Phase 1: Minimal Viable Sprawl

Focus: Core grid movement, Merc/Razor kits, basic A* drone logic, the "Safe Space" Hub, and the Curator quest-line.

Phase 2: Ghost in the Machine

Focus: Layered Matrix maps, ICE enemies, and the Picture-in-Picture (PIP) vulnerability window.
